Front tree

Little Gem Magnolia - a type of Evergreen

The Project Steps

Step 1 - Ann designed the basic garden space

Step 2 - Hired a garden consultant to recommend plants and layout

- Christine Black designed our layout and recommended plants for each area.
christine@grownativegardens.com, 609-321-4622 cell

Step 3 - Obtained HOA approval for garden expansion

Step 4 - Completed the initial plans

Hired a landscaping company to create the garden space, remove 2 trees, and plant 2 trees (Fall 2021). Then the initial plants were planted by November. Some plants in the original garden, including those from our prior home, were kept or moved to a new spot.

- Wilson Quierago, local landscaper and team, expanded and constructed the new gardens, and planted the trees. 609-560-1732

Step 5 - Changed our composting method

We had our own compost bin for years at our prior home. After moving, we initially dug holes or took scraps to Mom's Organic Grocery Store. We now use a pickup service.

- Garden State Composting - pickup service, www.gardenstatecomposting.com

Step 6 - Replaced and expanded our old patio.

Sold the old bricks (for reuse, saving dumping fees and resources).

- Luna Contracting, www.lunacontracting.com

Step 7 - Purchased and planted more plants (Spring 2022)

Most plants were purchased via mail order or at local plant sales. The Dusty Miller and Obedient plants are from cuttings from a Village Greenes friend's garden.

- Axten's, Marlton, NJ - trees
- Harriet's Garden, Shamong, NJ (follow on Facebook for sale notices)
- Holland Bulb Farms (mail order)
